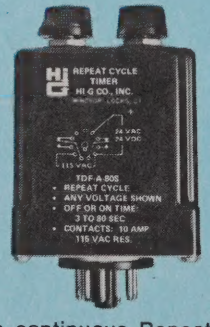
Programmable Models TDP permit user selection of two modes: DELAY-ON-OPERATE, or DELAY-ON-RELEASE. Depending on the specific model selected, the input voltage ranges possible are: 12/24 VDC or 24/120 VAC plus 24 VDC, or 120/240 VAC. Two delay ranges are available, depending on model chosen: 0.3 seconds to 300 seconds, or 1 to 120 minutes. Within these basic ranges jumper selectable ranges are possible. Non-programmable conventional models TDO, TDR, TDN are shown on Page 3528.

MODELS
TDF
TDI

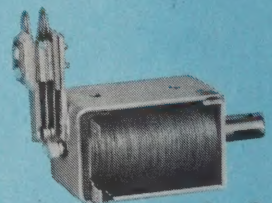


See Page 3531

Model TDF provides continuous Repeat Cycling (Flasher) action. Model TDI — Delayed Interval Timer delivers a single OFF-ON-OFF cycle. Initiation always starts the OFF period first. Individual non-interacting controls adjust OFF/ON ratio. Both models operate from 24 VAC, 24 VDC or 120 VAC. Three timing ranges available.

SOLENOIDS

THE INTERCHANGEABLES



See Page 3524

HOW TO USE eem

eem/Electronic Engineers Master is the world's largest single collection of catalog pages from the manufacturers of electronic and electro-mechanical components, systems and equipment.

The catalog pages are divided into 43 product sections for rapid comparison and evaluation of similar products.

1. ALPHABETICAL INDEX OF MANUFACTURERS' CATALOG PAGES

To locate a particular manufacturers' catalog page by manufacturers' name, look them up in the complete alphabetical index which appears at the beginning of **Volumes 1 & 2.**

2. MANUFACTURERS' INDEX TO CATALOG PAGES BY eem PRODUCT SECTION NUMBER

To locate a particular manufacturers' catalog pages by one of the 43 product sections, look them up by section number in the complete index which appears at the beginning of **Volumes 1 & 2.**

3. PRODUCT INDEX AND DIRECTORY

The Product Index begins on **Page 1 of Volume 1.**

To locate a specific product, look in the alphabetical Product Index and Directory. Under each product heading, manufacturers are listed alphabetically. Those manufacturers with product information in the catalog are shown in **bold face** type with page numbers. For catalog information on this product, refer to the page numbers shown. Where a **bold face** listing appears with an asterisk, the product is not cataloged in this edition. Those manufacturers who have submitted data to verify that they do manufacture this product but have no further data in this edition, are shown in light face type.

NOTE:
The letter "**d**" preceding the listing indicates the product is available from distributors.

The letter "**m**" preceding the listing indicates the product is available to military specifications.

4. eem FILE SYSTEM

The **eem** File System is a method of conveniently filing manufacturers' catalogs, technical bulletins or magazine articles. It is divided into 43 product sections to coincide with the **eem** product section numbers as used in this edition. Use this index to file and locate information on specific products. In addition, in the sub-classification of **eem** products all similar products are grouped together by **eem** product section numbers. The **eem** File System begins on the green edged pages at the back of the Product Index and Directory.

5. MANUFACTURERS, SALES OFFICES AND TRADE MARKS DIRECTORY

To locate a manufacturer by name, refer to the alphabetical Manufacturers, Sales Offices and Trade Marks Directory. Each listing contains complete address and phone numbers of main offices, branch offices, local representatives and local distributors.

Bold face listings indicate manufacturers who have catalog pages in this edition. Their page numbers are included. Trade marks with descriptions of the products and names of their manufacturers are combined alphabetically with manufacturers' names and are identified by (TM).

Plus . . . This important additional information:
Federal Supply Code (FSC) Number
Corporate Logos

The Manufacturers' Directory begins on the yellow pages immediately following the green edged pages of the Product Index and Directory.

6. MANUFACTURERS' CATALOG PAGES

eem/Electronic Engineers Master is the world's largest single collection of catalog pages from the manufacturers of electronic and electro-mechanical components, systems and equipment. The white catalog pages appear in each **eem** product section in alphabetical order, where possible, by manufacturers' name. There is a complete guide to each product section appearing at the beginning of **Volumes 1 & 2.**
